

# OIL MANAGEMENT SYSTEMS

JMCO

**JMCO** IS A SYSTEM FOR CONTROLLING OIL DELIVERY FROM ONE OR MORE CENTRAL TANKS. IT IS ORGANISED AROUND THE CONTROL UNIT, WHICH CAN CONTROL UP TO 4 DELIVERY POINTS WITH 4 DIFFERENT PRODUCTS. PROVIDED WITH LCD AND MEMBRANE KEYPAD, IT GUIDES THE OPERATOR IN THE DATA INPUT PHASES AND DISPLAYS THE QUANTITIES DELIVERED. IT PERMITS DELIVERY IN PRE-SELECTION AND CONTROL OF THE QUANTITIES IN THE TANKS.

THE UNIT IS PROVIDED WITH A PRINTER FOR THE ISSUE OF TICKETS AT THE END OF DELIVERY AND FOR DETAIL AND FINAL PRINTOUTS FOR CONTROL OF THE DELIVERIES PERFORMED. THE SYSTEM CAN BE INTEGRATED WITH REMOTE DISPLAY AND REMOTE PRINTER AND CAN BE DIRECTLY INTERFACED WITH THE PULSER VALVE (GPV) UNITS FOR CONTROL OF INDIVIDUAL DELIVERY POINTS. THE ENTIRE SYSTEM IS POWERED BY THE CONTROL UNIT WHICH IS PLUGGED INTO THE MAINS. A SIMPLE, INTUITIVE, PURPOSELY DEVELOPED SOFTWARE ASSISTS THE OPERATOR IN THE INSTALLATION, CONTROL, DATA PRINTING AND DELIVERY PHASES. DATA SAFETY AND SYSTEM RELIABILITY ARE GUARANTEED BY A TESTED ELECTRONIC SYSTEM. SIMPLE, COMPLETE, RELIABLE AND ECONOMIC, IT HAS BEEN CONCEIVED AND DESIGNED FOR APPLICATION IN SMALL WORKSHOPS AND CONTROL OF DISTRIBUTION EQUIPMENT.

**PERFORMANCE**

- SIMPLE IMMEDIATE INSTALLATION
- SYSTEM CONFIGURATION AND CUSTOMISATION ASSISTED BY SOFTWARE PROCEDURE
- CONTROL OF UP TO 4 DELIVERY POINTS
- DELIVERY BY AUTHORISED PERSONNEL ONLY (UP TO 99 USER CODES)
- DELIVERY IN PRE-SELECTION UP TO 99.9 LITRES/MIN
- CONTROL OF USE OF FLUID BY JOB NUMBER, REGISTRATION NUMBER AND ODOMETER
- LOADING AND UNLOADING OF TANKS, WITH ABILITY TO CONTROL UP TO 4 TANKS
- ABILITY TO STORE UP TO 2000 DELIVERIES
- CONTROL AND PRINTING OF DELIVERY DETAILS WITH POSSIBILITY OF FILTERING THE DATA PER PERIOD, PER OPERATOR OR PER PRODUCT
- CONTROL AND PRINTING OF UNLOADING AND LOADING MOVEMENTS OF TANKS FROM DATE TO DATE
- CONTROL AND PRINTING OF TANK LEVELS WITH AUTOMATIC UNLOADING OF TANK AFTER EACH DELIVERY
- SAFETY OF DATA STORED EVEN IN THE EVENT OF POWER CUTS
