

New fluids, new solutions

Urea

Reduce the truck pollution.

Inox meter

Automatic nozzle (available)

40 l/m'

New SUZZARA BLUE

Urea dispenser

The new EURO 4/5 Directive, concerning the reduction of emission in the atmosphere, can be met with the installation of an SCR system in the truck. The system requires a special liquid (a water/urea mixture). Each truck will be fitted with an additional tank containing this liquid. As a result of a through analysis of the problems to do with transferring this liquid, PIUSI has developed a reliable dispensing group using highly compatible components.

Performances:
Flow-rate 40 l/min.
Max delivery pressure 5 bar.
Self priming height up to 2 meters.
Meter accuracy +/- 1%

Rapsoil

The bio-fuel, renewable and ecologic.

New Rapsoil dispensers

A complete range of products and dispenser compatible with the requirements of Rapsoil
