

# 13 Products to avoid a refuelling disaster!

## SB325 & Miss-Filling Spout

Prevents your drivers from miss-filling AdBlue into the diesel tank by only dispensing into vehicles that have a magnetic adaptor fitted.

## Recirculation Unit

Prevents fuel in your storage tank from getting stagnant, avoiding expensive damage and downtime to equipment and vehicles.

## Tank Gauge

Visually displays your tank's fuel contents so that you're aware of when to order more and you don't run out of fuel unexpectedly.

## Spill Kits

Compact, easy access kits providing all you need to quickly deal with a spillage - stopping the spill spreading, saving on clean up costs.

## SpinSecure Oil Tank Lock

Secure your fuel from thieves with the padlock-free locking device which when locked is almost impossible to remove without the keys.

## Pump Timer Box

Controls the running time of a pump, so if you accidentally leave the pump on, it won't run dry and cause damage and costly pump downtime.

## Emergency Repair Tape

Quickly repair your leaking hose - temporarily solving the leak until an engineer fixes it or fits a new hose.

2

## Fill Point Cabinet

Secures your fill point away from costly and infuriating fuel theft but still allows you to take level readings via the handy, partial glass front.

4

## Overfill Prevention Valve

Prevents overfills and loss of fuel by automatically stopping the fuel delivery when your storage tank has reached its full capacity.

6

## Tank Alarm

Alerts you to a problematic status of your fuel tank so you can take action by giving warnings for your fluid level, overfill and/or bund leaks.

8

## Fuel Filter

Free your fuel of impurities such as water and particles, stopping contamination and therefore avoiding you costly downtime and maintenance.

10

## FloStop® Husky Nozzles

Shuts off flow when spout is raised above horizontal or if it falls from the fill point, preventing messy spillages and the costly loss of fuel.

12

## Fuel Management Systems

Prevent unauthorised access to fuel and eliminate the over use of fuel cards. FMS will ensure fuel is used effectively and doesn't get stolen.
