

The Heating Oil Tank Owner's Get Winter Ready Checklist

With the winter season being just around the corner, it is crucial that you check your oil heating system and make sure everything is working properly. Use this handy checklist to make sure you and your oil heating is ready for winter!

- Check your oil tank gauge reading to identify your tank's current fuel levels.
- Contact your fuel supplier or local oil buying club to order your fuel delivery.
- Arrange your annual service to check your oil heating system is in working order.
- Visually inspect your tank for anything immediately obvious e.g. a broken gauge or lost filler cap
- Let your service engineer know of the above in advance so they arrive with necessary replacements.
- Is your fuel protected against theft? Do you have an oil tank lock? Do you have CCTV or a motion sensor light?
