- Before connection, make sure that the tubing and the suction tank are suitable for the intended application.

- During installation and maintenance make sure that the equipment is not subjected to any damage.

To maximize performance and prevent damage, perform regular maintenance checks.

Refill the tank periodically to maintain the correct level of fluid.

- Remove the blockage from the suction tank to ensure uninterrupted flow.

In the case of installation in the open air, proceed to protect the equipment from environmental factors.

- Do not run the pump dry for more than 20 minutes. This can damage the motor.

Close the delivery valve to stop dispensing.

The choice of pump model must be made keeping in mind the characteristics of the application.
