Il sistema di distribuzione SUZZARABLUE è stato progettato e descritto in questo manuale in base a quanto impostato dai costruttori. Le informazioni e le istruzioni in questo manuale si basano su dati di prodotto accurati. Tuttavia, la produzione può variare leggermente dalle condizioni descritte in questo manuale. Pertanto, è importante che gli utenti effettuino verifiche regolari per assicurarsi che il prodotto si trovi in condizioni di sicurezza. In caso di anomalie, contattare il proprio rivenditore immediatamente per informazioni aggiornate.

Nel caso di utilizzo di sigillanti sul circuito di aspirazione, evitare assolutamente il contatto tra l’alimentazione elettrica e il tubo di aspirazione. Chiedere immediatamente l’aiuto di persone addetto alla manutenzione in caso di infortuni.

ATTENZIONE

La documentazione è a disposizione dell’autorità competente su motivata richiesta.
1. DECLARATION OF CONFORMITY

The undersigned, s[d]eclare(s) that the equipment described below complies with the harmonized European standards for health and safety.

The product conforms to the following harmonized European standards:

- EN 60335-2-79
- EN 60950-1

2. GENERAL SAFETY RULES

- Follow all the safety instructions and notes contained in this manual. Failure to do so may result in personal injury.
- The operator must be trained in the equipment's safe and correct use.
- The equipment must not be used by persons who are not adequately trained or who are under the influence of drugs, alcohol or other substances.
- The equipment must be used in accordance with the instructions provided in this manual.

3. SAFETY INSTRUCTIONS

- Never touch the equipment during operation.
- Always wear personal protective equipment (PPE) when using the equipment.
- Do not leave the equipment unattended while it is in operation.

4. FIRST AID RULES

- In case of a spill, immediately disconnect the equipment from the power source.
- Use personal protective equipment (PPE) when cleaning equipment.
- If you are injured, seek medical attention immediately.

5. GENERAL EQUIPMENT CHARACTERISTICS

- The equipment is designed for use in a specific environment.
- The equipment is not suitable for use in potentially explosive atmospheres.
- The equipment is not suitable for use in environments with a risk of fire or explosion.

6. DISPENSING SYSTEM PACKAGING

- The dispensing system comes packed in a cardboard box bearing the following information:
- Lot number / Production year
- Technical data

7. PACKAGE CONTENTS/PRE-INSPECTION

- Before using the equipment, inspect the packaging for signs of damage or tampering.
- Check the equipment's components for any defects or damage.

8. MACHINE AND MANUFACTURER IDENTIFICATION

- The equipment's serial number is located on the pump body. The serial number is important for service and warranty purposes.
- The manufacturer's information is located on the equipment's铭牌.

9. TECHNICAL SPECIFICATIONS

10. INTENDED USE

- The equipment is intended for use in retail or industrial environments.
- The equipment is suitable for dispensing liquid or solid substances.

11. TREATED PRODUCT CHARACTERISTICS

- The equipment is suitable for dispensing products with the following characteristics:
- Temperature: 5-40°C
- Viscosity: 0.5-3000 mPa.s
- pH: 2-12

12. INSTALLATION

- Before installation, ensure that the equipment is compatible with the installation environment.
- Follow the manufacturer's instructions for installation.

13. ASSEMBLY

- Assembly must be performed by a qualified technician.
- Ensure that all components are securely fastened.

14. INSTALLATION ONTO IBC TANKS

- The equipment is designed for use with IBC tanks.
- Ensure that the equipment is properly secured to the IBC tank.

15. OPERATION AND USE

- The equipment must be used in accordance with the instructions provided in this manual.
- Always use personal protective equipment (PPE) when using the equipment.

16. LEAVING THE SYSTEM UNUSED FOR LONG PERIODS OF TIME

- Before leaving the system unused for long periods of time, drain all the fluid.
- Ensure that the system is turned off and disconnected from the power source.

17. WASHING THE DISPENSING SYSTEM

- The equipment must be washed in accordance with the manufacturer's instructions.
- Use warm water and a mild detergent.

18. MAINTENANCE

- Regular maintenance is necessary to ensure the equipment's long-term functionality.
- Contact the supplier for maintenance instructions.

19. TROUBLESHOOTING

- In case of a fault, check the equipment's troubleshooting guide.
- Contact the manufacturer for further assistance.

20. DEMOLITION AND DISPOSAL

- Proper disposal of the equipment is necessary to prevent environmental damage.
- Follow local regulations for the disposal of industrial waste.

NOTE

- This symbol indicates that there is risk of damage to the equipment.

To the customer:

Thank you for choosing our dispensing pump. We are proud to provide you with a system designed to meet your specific needs.

Yours sincerely,

[Your Name]
